FORKLIFT OPERATOR CERTIFICATION: 3 yr Certification, includes theory and practical training per OSHA requirements.

HAZWOPER 8, 24 OR 40 HR: Let UBTech provide the knowledge and skills necessary to ensure the safety of response personnel when taking action to contain and control releases of hazardous materials or response to disaster events that have impacted the workplace.

PEC H2S CLEAR
This course not only improves safety performance, it also prepares general industry workers by providing crucial knowledge of the dangers of H2S and all the precautions, tools and controls necessary when working in H2S environments. This course has no prerequisite and covers the current classroom requirements of ANSI Z390.1 and is designed to meet the new ANSI requirements.

COMPLIANCE PROGRAM BUILDING
Do you have the required written OSHA programs for your business? Our new Compliance Program Building Course is designed to help identify and build the programs you need to stay compliant to OSHA and other regulatory agencies. This course focuses on management, leadership and employee involvement, worksite analysis and hazard prevention and control, and safety and health training and education. Students will learn what written programs are needed based on their industry as well as the requirements for programs such as fall protection, general safety and health programs, HAZCOM, Permit required confined space, respiratory protection, lockout/tagout and many more.
